Work Experience:

- Machine Learning Engineer:
  - **Ajobthing Malaysia, September 2019 – Present**
  - create scoring systems for jobseekers or companies based on their behavior
  - find the insight from the data to support the business decision
  - provide knowledge from the data to the other team (developer, marketing, sales)

- Data Science Researcher (Master Student):
  - **National Central University Taiwan, Sept 2017 – July 2019**
  - Part of Intelligent Systems Software Laboratory
  - Join several projects, one of which is "Detecting steering handling position using one smartwatch with a machine learning approach"

Education:

- National Central University Taiwan:
  - Master Degree, Computer Science (2017 - 2019)

- Brawijaya University:
  - Bachelor Degree, Computer Engineering (2011 - 2016)

Research and Project

- Detecting steering handling position using one smartwatch with a machine learning approach

- Multi-Posture Touch Behavioral User Authentication On Smartphone

- Jobseeker Scoring, based on their history and behavior in the application
